

Technical Data Sheet

Material Designation

Grade F

Material Properties
Summary

☒ *Binderless*

☐ *Organic Binder*

☐ *Double Laminated*

☐ *Acrylic Binder*

☐ *Laminated*

☐ *Hydrophobic*

This is an ultra high efficiency particulate air filter material especially suited to applications requiring a very high degree of efficiency. The absence of organic binder and fungicide makes this grade eminently suitable for chromatography and analytical filtration.

Comments:

Widely used in airborne particulate monitoring applications. Material demonstrates a 99.999% efficiency.

Actual filtration performance, i.e. efficiency and dust holding capacity, will vary depending upon filter design parameters and the normal variation of the media properties consistent with the specification range. We continuously strive to define our products and hence the specifications are subject to change.
